

LOL-HECO-IR-73

Question(s):

Please provide and index and copies of all correspondence over the past 10 years between the Oahu Civil Defense Agency and Hawaiian Electric Company with regard to upgrading transmission, subtransmission lines and substations within the Pukele Service Area.

HECO Response:

There are no records of any correspondence over the past 10 years between HECO and the Oahu Civil Defense Agency with respect to upgrading transmission, subtransmission lines and substations within the Pukele Service Area. However, through HECO's Environmental Impact Statement (EIS) consultant (CH2M Hill), the State Civil Defense was provided copies of the 1998 Kamoku-Pukele 138-kV Transmission Line Project Draft EIS and the 1999 Kamoku-Pukele 138-kV Transmission Line Project Revised Draft EIS for comments. The Revised Final EIS that was accepted by the Department of Land and Natural Resources has been furnished as Exhibit 5 in the Application.
